### Leadership (Don't Push; Pull)

**G**eneral Eisenhower used to teach leadership with a simple piece of string. He would put it on a table and say: "Pull it and it will follow wherever you wish. Push it and it will go nowhere at all, It is just that way when it comes to leading people."

Now, if there are two rings - one tied to each end of the string - and when the string is stretched out and kept on the table and one ring is pushed towards the other, the other ring doesn't move. However, if it is pulled, the other ring follows it. Now, one ring can be you and the other your employee or subordinate.

Don't push people into doing things. Pull (motivate) them.
