DGP J&K presided and senior Police Officers participated in the seminar. Shri R.Tikoo, IGP CID, presented the theme paper on which discussions were held.

It was widely felt that in the existing system of coordination between various forces, representatives of the people should also be co-opted. Tracing of heinous militancy related crimes by police can go a long way in improving our credibility and weakening the adversary. A need was felt for launching of counter propaganda against the mischievous Pakistani designs. There was a consensus that important towns can gradually be taken over by local police assisted by CRPF but rural areas will need continued operations by Army and Para-military forces. The seminar also highlighted need for attention in border areas of Jammu Province particularly districts of Poonch and Rajouri.

### SOME FACTS ABOUT TERRORISM

☆ In the 1970s, 80 percent of terrorist attacks throughout the world were directed against property and 20 percent against people.

In the 1980s, about half of the attacks have been directed against people.

☆ The odds of catching and punishing terrorists are not high. The Jaffee Centre for Strategic Studies in Tel Aviv reports that only one out of ten terrorists is ultimately captured or killed.

☆ According to the training manual of the E.T.A., a militant organisation of Basque region of Spain "The enemy (Government) is 1000 times stronger than we are. But each time we attack, at the very moment and place, we are stronger than he is. The enemy, stung by many bees, is infuriated to the point of uncontrollable rage and strikes out blindly to the right and left and everywhere. At this point, we have achieved our main objective - forcing him to commit untold atrocities". (Courtesy: The Editor, 'The Black Cat').
